# Professional piston compressors

Automan PRO 2.2-4 kW/3-5 hp

## The ultimate workshop compressor

As a professional, you need a compressor that can keep up with your pace, your workload and the requirements of your workshop. The 3-5 hp Automan PRO is your best-in-class solution. Powering the Automan PRO is a premium pump that will give you a lifetime of dependable energy. In addition, the Automan PRO comes with specifically designed features to ensure that all-important safety, reliability, ease of use and flexibility.

## Features & benefits

### Reliable & safe

- Premium piston pump technology.
- Inside-coated vessel and automatic drain prevent condensation and rust.
- Filter pressure regulator safeguards air quality.
- Fully enclosed metal belt guard protects the operator and compressor belt.

### Easy to use

- High-quality condor pressure switch and manometer allow for precise pressure setting.
- Full handle grip for easy handling (3 hp models).
- Lightweight and compact for smooth maneuverability (50 & 90-liter models).

### Flexible configurations

- From 3 to 5 hp.
- 10 and 11 bar versions.
- 50, 90 and 270 l receivers.
- All-in-one build reduces the unit's footprint for flexible placement.

## Precise engineering

### Powerful pump

The PRO's low running speed ensures a long service life and low noise levels. Its high volumetric efficiency of 76% means you get more air with less energy consumption.

### Automatic drain

Moisture can compromise your air system and your final products. The automatic drain removes condensate when needed to help prevent corrosion.

### Metal belt guard

Safety always comes first. The PRO's sturdy metal belt guard protects both the operator and the compressor belt.

### Pressure switch

The advanced condor pressure switch and manometer allow for easy, precise pressure setting of your Automan PRO.

## A lifetime of performance

### Service kits

Atlas Copco's genuine parts extend the service life and reliability of your Automan PRO. Our handy service kits contain all the necessary parts to ensure quick and easy maintenance.

### Lubricant

Our Automan Fluid was specifically formulated to offer reliable, long-lasting lubrication, even in your demanding workshop environment.

## Technical specifications

Model	Motor power		Max. pressure bar	Displacement l/m	FAD l/m	Motor speed rpm	Cylinders & stages	Receiver (l)
	HP	kW						
AC 31 PRO 50	3	2.2	10	360	215	1050	2 & 1	50
